Address Your Needs

Needs + Budget

Now it's time to bring together the needs you uncovered in your environmental audit with your project budget! Take out your environmental audit sheets and look at the things you listed- things like furniture, lighting, construction work or other items your space needs.

Now list those items in your budget spreadsheet (it's ok if you don't know how much they cost yet, you'll figure that out in the next step!)

If you feel like you rushed through the environmental audit, take a second now to look at this again- what is truly needed in your space to create the home office that speaks to your soul? It could be as simple as new furniture or as big as a complete room gut and remodel. It's all up to you!

Also keep in mind that you might not want to do everything at once when you take a look at costs, and that's ok! You can use the budget sheet to prioritize which items are most important to you in relation to how much you can afford to spend right now.
